

YOUR BUSINESS, YOUR WAY
FLEXIBLE APPLICATIONS THAT GIVE YOU CONTROL

INTANDEM SOLUTIONS

ABOUT INTANDEM SOLUTIONS

Since 2004 our intuitive applications have been improving and automating workflow for businesses across the world. We don't just code, we create solutions that work with your business and its specific requirements, each solution delivering compliance, efficiency and then futureproofed to grow with you every step of the way.

Although established in 2003, we have over 30 years industry and application development experience, that has given us a well-earned reputation for delivering our expert service in application technologies. We understand integration, business processes and data management requirements and use this to bring guidance and best practice to every

application we deliver. We have designed and developed a suit of products and custom application solutions for organisations in many market sectors across the globe, from small businesses to large global corporates. We work to precise specifications and defined functional requirements and deliver applications through our experienced and qualified project teams.

We pride ourselves on the ability to advise and react when needed and to maintain and grow client relationships, our first client is still our client. The company is dedicated to providing the best solutions and we are constantly incorporating new technology within the product suite with the likes of the Android platform and RFID technology to name a few.

FLEXIBLE AND INTUITIVE SOLUTIONS

All our applications are designed to adapt as your business changes and evolves over time allowing you to scale up or automate at your own pace.

We know that you work hard to grow and expand your business, our solutions ensure that your growth is supported by fluid, flexible and scalable applications.

Intandem Solutions have a product suite that provides exceptional value add to any organisation. With products ranging from Mailroom Management, Records and Archive Management through to Design and Reprographics Management, we provide the expertise and industry knowledge and can help tailor these products to meet your exacting demands.

All our applications are web based which means that there is a very light IT footprint needed to run them and are very quick to install and customise. Alternatively we also provide securely hosted solutions with a choice to host in either the UK, US or the within the EU depending on your data storage policies

Whether you need a compliant records management application or need to distribute, control and manage work with various designers around the world, we have you covered with integrated solutions that remove duplication and increase productivity exponentially. Even if our current suite isn't quite what you are after, our 4U service delivers bespoke solutions every bit as unique as you are.

JOBTRACK

BECAUSE IT IS NEVER JUST A JOB

The only application truly created for the demanding nature of design and reprographic studios across the world, JobTrack brings back control and management of work and workflows to allow creative agencies to focus on what they do best; delivering passion and perfection. Built and continually enhanced in collaboration with some of the top design studios and global design management teams; JobTrack is fluid and intuitive, combining all of the components necessary for time, cost, resource and project management to bring you a single integrated application.

As with each of our applications, JobTrack is delivered with the usual powerful user configuration and workflow customisation, putting expansion and growth firmly back in your control, providing a scalable system without the need for ongoing configuration costs.

FILETRACK COMPLIANT RECORDS MANAGEMENT WRAPPED UP

Accurate and consistent records management has never been as important to organisations as it is today and with regulations and legislation continually getting tougher, FileTrack is the powerhouse application that is truly capable of meeting demands. An intuitive system that brings the necessary flexibility to grow along with your records and information policies and ensure that an accurate audit trail is maintained throughout the life-cycle of a record.

Fluid integrations with practice management systems such as Elite™, LegalKEY, and a number of other SQL systems allow for elimination of duplicated efforts and whilst ensuring consistency from the moment a record is created. FileTrack can also integrate with off-site storage vendors, bringing unity between on and off-site records management services.
